Overview

The Data Acquisition System GM is a data logger that excels in versatility and expandability. The main unit includes on-board memory for data acquisition and also supports SD cards for external storage. The system consists of a Data Acquisition Module (GM10), Power Supply Module (GM90PS), and Module Base (GM90MB), which is used to mount a variety of modules.

SMARTDAC+ GM utilizes the same modules as the GX/GP series of SMARTDAC+.

- **High expandability and maintainability**: Employs YOKOGAWA’s original block structure, making it easy to rearrange the combination of required modules. The structure also excels in maintainability because even after installation, every module can be removed separately.
- **Multichannel measurement**: Measures up to 420 analog input channels on the GM10-2 and up to 100 channels even on the GM10-1.
- **Flexible system configuration**: A wide variety of systems, such as multichannel measurement from 10 to 420 channels or data acquisition through communication, can be configured.
- **High environmental tolerance**: The guaranteed operating temperature range of -20°C to 60°C allows more freedom in where the system can be installed.
- **Mounting**: Not only can the system be installed on a desktop, it can also be mounted on DIN rails or a wall.
- **Less wiring through distribution**: Installation of sub units away from the main unit makes measurement possible without connecting sensor signal wires over a long distance.
- **Long-term recording and saving**: Large internal memory (500 MB on the GM10-1 and 1.2 GB on the GM10-2) allows long-term recording and saving.
- **Secure saving of recording data**: An SD card (SD/SDHC) up to 32 GB (1 GB included) can be used for the external storage medium. And the FTP client function can be used to provide data redundancy using a file server.
- **Rich I/O interface**: Four types of I/O modules are available: analog input, digital input, digital output, and digital I/O. DCV (DC voltage), TC (thermocouple), RTD (resistance temperature detector), DI (contact or TTL level voltage), mA (DC current) can be assigned to each channel as input signals.
- **Web server function**: Various settings can be configured online from a Web browser, without using a dedicated software application. Moreover, measured data can be monitored in real time.

### Input Type Measuring accuracy*1 (typical value*2)

<table>
<thead>

</tbody>
</table>

*1 These values have been calculated from the accuracy testing data at the time of shipment of the instrument from the factory.

*2 For the measuring accuracy (guaranteed), see the module’s general specifications (GS 04L53B01-01EN).

*3 These values do not include the reference junction compensation accuracy.
CONFIGURATION
SMARTDAC+ GM handles a wide variety of applications through the combination of various modules.

The unit that includes GM10 (Data Acquisition Module) is called the main unit. A unit connected to the main unit via GX90EX (expansion module) is called a sub unit. Modules in a unit can be connected by installing a GM90MB (Module Base).

- Unit Types
  - Main Unit (Single Unit)
    A unit consisting of a GM10 and a GM90PS. Up to 10 I/O modules* can be connected to a unit.
  - Main Unit (Multi Unit)
    A unit consisting of a GM10, a GM90PS and a GX90EX. Up to six I/O modules can be connected to a unit. Up to six sub units can be connected via the GX90EX.
  - Sub Unit
    A unit consisting of a GM90PS and a GX90EX. Up to six I/O modules can be connected to a unit. The main unit and sub units are connected using LAN cables. The maximum connection distance between two units is 100 m.

- Module Types
  - Model | Description
  |-------|------------------|
  | GM10  | Data Acquisition Module for SMARTDAC+ GM
  |       | A module that acquires data from I/O modules and expansion modules.
  |       | A main unit requires one module of this type.
  | GM90PS| Power Supply Module for SMARTDAC+ GM
  |       | A module that supplies power to the modules connected in the unit.
  |       | A unit requires one module of this type.
  | GX90EX*| Expansion module
  |       | A module that connects units to expand the system.
  |       | A main unit or a sub unit requires one module of this type.

* Up to 8 when a GX90XA-T1 is connected

For the detailed specifications of the expansion module, see the following general specifications.
Material No.: GS 04L53B00-01EN

I/O Modules
The firmware version of I/O modules that can be used on the SMARTDAC+ GM must be R1.04.01 or later.

- Model | Description
  |-------|------------------|
  | GM90MB| Module Base
  |       | This is used to connect modules (excluding the GM90PS).

* The firmware version of GX90EX that can be used on the SMARTDAC+ GM must be R1.02.01 or later.
For the detailed specifications of the I/O modules, see the following general specifications.

Material No.: GS 04L53B01-01EN

**System Configuration**
SMARTDAC+ GM supports both standalone operation and data acquisition using a PC.

**Single Unit System**
A system configured with only a main unit.

- **Use as a stand-alone type**

- **Use by connecting a PC**

**Multi Unit System**
A system configured with a main unit connected to sub units.
- **Up to six sub units can be connected to a main unit. Each unit can connect up to six modules.**
- **For analog input, up to 420 channels (GM10-2) and up to 100 channels (GM10-1) can be measured.**

- **Use as a stand-alone type**

- **Maximum connection distance between two units is 100 m.**

- **Sub unit**

* The main unit and sub units are connected using LAN cables.
**SMARTDAC+ GM COMMON SPECIFICATIONS**

- **Compliant Standards**
  - CSA: CSA22.2 No.61010-1, installation category II\(^2\), pollution degree 2\(^3\), CSA C22.2 NO. 61010-2-030-12
  - UL: UL61010-1, UL 61010-2-030(CSA NRTL/C)
  - CE:
    - EMC directive: EN61326-1 compliance, Class A Table 2
    - Low voltage directive: EN61010-1, EN 61010-2-030
    - Installation category II\(^1\), pollution degree 2\(^2\)
    - Measurement category II\(^3\)
  - CE marking: EN62311 compliance

- **WEEE Directive:** Compliant

- **Normal Operating Conditions**
  - Rated supply voltage: 100 to 240 V AC
  - Allowable supply voltage: 90 to 264 V AC
  - Power frequency: 50 Hz ±2 %, 60 Hz ±2 %
  - Power consumption:
    | Supply voltage | Normal operation* | Maximum |
    |----------------|-------------------|---------|
    | 100 V AC       | 25 VA             | 45 VA   |
    | 240 V AC       | 35 VA             | 60 VA   |

  * When 10 analog input modules are connected

- **Ambient temperature:** −20 to 60 °C
  - −20 to 50 °C in the following cases
    - When a GX90YD is used
    - When a GX90WD is used
    - When a GX90XA-T1 (electromagnetic relay type) is used
    - On a GM10 with the /C8 option

- **Ambient humidity:** 20 to 85 %RH (no condensation)

- **Magnetic field:** 400 A/m or less (DC and 50/60 Hz)

- **Vibration:** \(5 \leq f < 8.4 \text{ Hz amplitude } 3.5 \text{ mm} \) (peak) \(8.4 \leq f \leq 160 \text{ Hz acceleration } 9.8 \text{ m/s}^2 \) or less

- **Shock:** Power supply ON, 98 m/s\(^2 \) or less, 11 ms (excluding GX90YD and GX90WD)
  - Power supply OFF, 500 m/s\(^2 \) or less, approx. 10 ms
  - 6 directions \((±X, ±Y, ±Z)\), 3 times in each direction

- **Mounting position:** Left and right horizontal, front and back horizontal

- **Altitude:** 2000 m or less

- **Installation location:** Indoors

- **Warm-up time:** At least 30 minutes after power on

- **Transport and Storage Conditions**
  - Ambient temperature: −25 to 70 °C
  - Ambient humidity: 5 to 95 %RH (no condensation)
  - Vibration: 10 to 60 Hz, 4.9 m/s\(^2 \) maximum
  - Shock: 392 m/s\(^2 \) maximum (in packaged condition)

- **Construction**
  - Mounting: Wall mount, DIN rail (panel storage, rack), desktop
  - Note: No stacking
  - Material: Polycarbonate

---

*1 Installation category (overvoltage category) II: Describes a number which defines a transient overvoltage condition. Implies the regulation for impulse withstand voltage. “II” applies to electrical equipment which is supplied from the fixed installation like a distribution board.

*2 Pollution degree 2: Describes the degree to which a solid, liquid, or gas which deteriorates dielectric strength or surface resistivity is adhering. “2” applies to normal indoor atmosphere. Normally, only non-conductive pollution occurs.

*3 Measurement category: Depends on the specification of each modules
GM10 DATA ACQUISITION MODULE

- 7 segment LED (x2)
- Status display
- START/STOP key
- USER key
- USB port
- Serial communications port (I/C3 option)
- SD memory card slot
- Ethernet port

7 segment LED: Displays the operation mode, system No., self-check operation, key lock, operation error, process running, and module installation information.

Status display:

USER keys (USER1/USER2): Executes specified actions (event action function)

- Functional Specifications

Measuring Function
Number of connectable modules and number of I/O channels:

<table>
<thead>
<tr>
<th>GM10-1 Modules</th>
<th>I/O channels</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 10</td>
<td>Up to 100</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GM10-2 Modules</th>
<th>I/O channels</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 42</td>
<td>Up to 500</td>
</tr>
</tbody>
</table>

Scan interval: Selectable from 100 ms, 200 ms, 500 ms, 1 s, 2 s, 5 s
Notes: Some intervals will be unavailable depending on the system configuration and modules.

Module connection limitations
- If a GX90XA analog input module (electromagnetic relay type: -T1) is connected, the maximum number of connectable I/O modules is eight.
- Up to a total of 10 GX90YD digital output modules and GX90WD digital I/O modules can be connected in each system.
- One GX90WD digital I/O module can be installed in each unit.
- The maximum number of connectable sub units is six.

- Data Saving Function
Data is recorded to internal memory and external storage medium. When the system recovers from a power failure, the operation that was being performed before the power failure is resumed.
- Internal memory: Temporarily saves various types of data.
  - Medium: Flash memory
  - Size: GM10-1: 500 MB
  - GM10-2: 1.2 GB
- External storage medium:
  - Medium: SD card (SD/SDHC)
  - Size: 1 to 32 GB (1 GB included)
  - Format: FAT32 or FAT16

Data saving to the external storage medium:
Select whether to save automatically or when a medium is inserted for event data, display data, manual sampled data, and report data.

Auto save: Automatically saves to the internal memory when a data file is created.

Save when a medium is inserted:
Saves unsaved data files when an external storage medium is inserted.

Channel Specifications
Operations such as measurement, computation, and recording are performed on channels.
- Channel name: A channel name is expressed with a 4-digit number. Channel names are specific to the system, so they cannot be changed. By setting tags or tag numbers to the channels, you can use any names you like.

X X X X

- Channel number
  - Analog input: 01 to 10
  - Digital input: 01 to 16
  - Digital output: 01 to 06
  - Digital I/O: Digital input: 01 to 08
  - Digital output: 09 to 14

- Slot number: 0 to 9

- Unit number
  - Main unit: 0
  - Sub unit: 1 to 6
• Data type:

• Alarm summary:

Saved item: Alarm of each data item

Maximum number of items saved to internal memory: 5000

Internal memory operation: FIFO (First In First Out)

Maximum number of items displayed on Web screen: Latest 1000

Save operation: Saves alarm information to internal memory when an alarm occurrence or release is detected

- Alarm information is saved to the corresponding event or display data file.

Saved content: Target channel name (tag name), time of occurrence or release, warning type, etc.

Save operation methods: Web browser, communication command
• Message summary:
  Description: Saves a summary of written messages
  Saved item: Message string
  Maximum number of items saved to internal memory: 1000
  Internal memory operation: FIFO (First In First Out)
  Maximum number of items displayed on Web screen: Latest 450
  Save operation: Saves message information to internal memory when message writing operation is performed.
  * Message information is saved to the corresponding display or event data file.
  Saved content: Message name, writing interval, user name, write group

• Manual sampled data:
  Saved item: Measurement (I/O module)/math (MT)/communication (MC) channels
  Number of saved channels:
  GM10-1: Up to 50, GM10-2: Up to 100
  Save operation methods: Web browser, communication command, event action
  Maximum number of events saved to internal memory: 400
  Internal memory operation: FIFO (First In First Out)
  Auto saving to an external storage medium: Every time manual sampling is executed
  Data format: Text format

• Setup data:
  Saved item: GM10 and I/O module settings
  (including setup data of modules connected via GX90EX)
  Saved events: Operation from a Web browser, communication command, event action
  Data format: Text format

• Report data (MT option):
  Saved item: Measurement (I/O module)/math/communication channels
  Select from average, maximum, minimum, sum, and instantaneous values
  Type: Hourly + daily, daily + weekly, daily + monthly
  User specified time (batch, day custom)
  Saved events: Timeout time of each report type
  Maximum number of events saved to internal memory: 800
  Internal memory operation: FIFO (First In First Out)
  Auto saving to an external storage medium: Save every time of the event
  Data format: Test format

• User data:
  Saved item: Excel report template (MT), PDF/print report template, SSL communication certificate (server certificate, trusted certificate), electronic signature certificate (MT)
  Recorded events: Operation from a Web browser, communication command

Message Write Function
Messages can be written to event data and display data.
• Message type:
  Preset message: Writes preset text
  Free message: Writes text that you enter
  Auto message: Writes fixed text when power recovers after a power failure occurs during recording.

• Preset message, free message:
  Number of displayable characters: Up to 32
  Displayable character types: Alphanumeric, Japanese, and Chinese characters
  Number of messages: Preset message: 100
  Free message: 10
  Free messages that you enter are also saved in setup files.

  Write method:
  Operation from a Web browser, communication command, event action
  Write destination: Specified event data or display data group or all groups

• Auto message:
  Displayed text: “Power-fail” + the time of failure occurrence
  Example: Power-fail 2014/01/06 09:49:21
  Write method: Writes a message when power recovers after a power failure occurs during recording.
  Whether or not to write is selectable.
  Write destination: All display data or event data groups

Alarm Function
• Number of alarms: Up to four alarms (levels) for each measurement channel
• Alarm type: High limit, low limit, difference high limit, difference low limit, high limit on rate-of-change, low limit on rate-of-change, delay high limit, and delay low limit
• Alarm delay time: 1 s to 24 hours (for each channel)
• Rate-of-change calculation interval of rate-of-change alarms: 1 to 32 times the scan interval (common to all channels)
• Hysteresis: 0.0 to 5.0% of the span (for each alarm level)
• Alarm output:
  DO output: DO operation: Energize/de-energize, hold/nonhold, AND/OR, reflash
  Internal switch output:
  Number of internal switches: 100
  Internal switch operation: AND/OR operation selectable
  Status LED display operation: Select whether or not to hold the indication until an alarm acknowledgement operation is performed
  Alarm no logging function: Possible to output only to the DO or internal switch when an alarm occurs (warning display and recording to the alarm summary are not performed)
  Alarm information: Displays a log of alarm occurrences on the alarm summary
  Reflash: The duration for which the reflash relays are deactivated can be set to 500 ms, 1 s, or 2 s.
  Individual alarm ACK function: Alarm display and relay output can be canceled on individual alarms.

Event Action Function
• Description: Execute a specified operation when a given event occurs.
• Number of settings: 50
  Events: Remote control input, etc.
  Timer: Number of timers: 4
  Match time timer: Number of timers: 4
  Action: Specify memory start/stop, alarm ACK, etc.
Security Function
- Key lock function: All GM10 key operations
- Login function: Only registered users can operate the GM (Ethernet/serial/I3)/USB/bluetooth (I/C8) operation (Including Web browsers)
- System administrators and users: Up to 50
- Number of Authority of user: 10 levels

Manual Sampling Function
- Description: Measured value at a user specified time
- Target: Measurement (I/O module)/math (I/O)/communication (I/M) channels
- Number of recording channels:
  - GM10-1: Up to 50
  - GM10-2: Up to 100
- Maximum number of data values that the internal memory can store: 400
- Data format: Text

Report Function (I/M option)
- Description: Report at each scheduled time of report
- Target: Measurement (I/O module)/math/communication channels
- Number of report channels: 60
- Maximum number of data values that the internal memory can store: 800
- Data format: Text

Setup Function
- Description: GM10 and I/O module setup
- Setup method: Web browser, communication commands, Hardware Configurator
- Output/read destination (for saving/loading): External storage medium

Clock Function
- Clock: With a calendar function
- Accuracy: ±5 ppm
  - Excludes the delay (of 1 second, maximum) caused when the power is turned on.
- Time setting: Using Web operation, communication commands, event action, or SNTP client function
- Time adjustment method:
  - Limit in which the time is gradually adjusted:
    - Select from the available settings between 5 s and 15 s.
    - Whether to change an out-of-limit operation immediately or report it as an error can be selected.
  - While memory sampling:
    - Corrects the time by 1 ms for each second.
  - While memory is stopped:
    - Immediately change the time.
- Time zone: Sets the time difference from GMT
- Date format: Select "YYYY/MM/DD", "MM/DD/YYYY”, "DD/MM/YYYY" or "DD.MM.YYYY".
  - MM expression can be selected from the numeric character or ellipse. Ex: January: 01 or Jan
  - The delimiter can be selected from "/", ".", ",", ",", "-".

Ethernet Communication Function
- Electrical specifications: Conforms to IEEE 802.3
- Connection: Ethernet (10BASE-T/100BASE-TX)
- Max. segment length: 100 m
- Max. connecting configuration:
  - Cascade Max. 4 level (10BASE-T), Max. 2 level (100BASE-TX)
- Connector: RJ-45
- Protocols: TCP, UDP, IP, ICMP, ARP, DHCP, HTTP, FTP, SMTP, SNTP, Modbus, dedicated protocols, and DARWIN compatible communication
- E-mail client: Automatically sends e-mail at specified times
  - E-mail is sent by events as below.
    - Alarm occurring/alarm canceling
    - Recover from power failure
    - Report data generating
    - Storage medium error, FTP client function error
    - Specified time period
- Supported authentication methods:
  - POP before SMTP, SMTP authentication (Login, Plain, CRAM-MD5)
  - FTP client: Automatically transfers data files to the FTP server
    - Applicable files: Event data, display data, report data, etc.
  - FTP server: Transfers files, delete files, manipulate directories, and outputs file lists
  - Max. number of the simultaneous connections: 4
  - Web server: GM10 real-time monitoring and setting changes/operations can be performed from a Web browser.
  - Max. number of the simultaneous connections: 4
  - SNTP client: Inquires the time to the SNTP server and sets the GM10
  - SNTP server: Outputs the GM10 time.
  - Time resolution: 5 ms
  - DHCP client: Automatically obtains the network address settings from the DHCP server
  - Modbus client: Reads data from another device and writes to the registers
  - Number of connectable severs:
    - GM10-1: Up to 16
    - GM10-2: Up to 32
  - Modbus server: Loads measurement and math channel data
    - Loads and writes communication channel data
    - Some control commands such as memory start
    - Filtering to accept connections only from specific IP addresses available
  - Max. number of the simultaneous connections: 4
  - Setting/Measurement server:
    - Operate and set the GM10 and output data using a dedicated protocol.
  - Max. number of the simultaneous connections: 4
  - DARWIN compatible communication server:
    - Supports some DARWIN commands
    - Communication with the GM10 is possible using DARWIN communication commands.
  - Output-related commands: Outputs measurement channel data, math channel data, relay status, decimal place of measurement channels, decimal place of math channels, system configuration information
  - Setup-related commands: Range, Scale unit, Alarm, Time, Moving average
• Operation-related commands: Reset alarm, Reset timer, Start MATH calculation, Rebuild system, Initialize, Input communication, Output communication DO, Write message

Batch Function
• Function: Data management using batch names. Enter text fields and batch comments in the data file.
• Batch name: Added to the file name of the event data and display data.
  Structure: Batch number (up to 32 characters) + lot number (up to 8 digits) Use/not use selectable for lot number, on/off selectable for auto increment function.
• Text field: Adds text to the event data and display data. There are 24 available text fields.
  Title: Up to 20 characters
  Text: Up to 30 characters per field
• Batch comment: Adds text to the event data and display data. 3 comments (max. 50 characters/comments) are available.

USB Communication Function
• Compliant standard: USB2.0
• Interface:
  Connector: mini B type
  Number of ports: 1
  Power supply: Self powered
• Implemented protocol: Dedicated protocol
  Operate and set the GM10 and output data using a dedicated protocol.
• Communication conditions:
  Baud rate: 115200bps, Parity: None, Data length: 8bit, Stop bit: 1bit, Handshake: Off

FAIL Output Function
• Function: Relay output from a specified channel of the GX90YD or GX90WD when a CPU error occurs.
• Output format: Relay contact
• FAIL output: Relay contact output when any of the various errors is detected
  Normally energized; de-energized when a system error occurs
• Rated load voltage: 24 V DC or 250 V AC or less
• Rated load current: 3 A (DO)/3 A (DIO), resistance load

Printer Output Function
• Printers supporting the HP PCL5c language and can print through port 9100 on a LAN connection
  Supports printing using the report template function (/MT).

SSL Communication Function
Communication that sends and receives information encrypted by the SSL (Secure Socket Layer) protocol is possible.
• Server function:
  Supported servers: HTTP server and FTP server
  Private key: Can be created on the GM10
  Server certificate: Server certificates created by users can be saved in the internal memory.
  Self-signed certificates can be created on the GM10.

• Client function:
  Supported clients: FTP client and SMTP client
  Trusted certificate: Trusted certificates (up to 80 KB total) can be saved in the internal memory.

Electronic Signature Function
Electronic signatures can be added to report files created in PDF format using the PDF form creation function. An electronic signature is provided each time a report file is created.
• Electronic signature certificate:
  Electronic signature certificates created by certificate issuing organizations can be saved in the internal memory.

Other Function
• Firmware update function:
  The firmware of the GM10 and connected modules can be updated from the GM10.
• A/D calibration function:
  The A/D calibration of connected modules can be operated from the GM10.

Web Server Function
Real-time data monitoring and setting changes/operations can be performed from a Web browser.

PC System Requirements

### Specifications of Options

#### Serial Communication Interface (/C3)
- **Connection:** EIA RS-222/485
- **Protocol:** Dedicated protocol, Modbus/RTU, or DARWIN compatible communication
- **Setting/measurement server function:**
  - Operation, setting or output of measurement data are available by dedicated protocol.
- **Synchronization:** Start-stop synchronization
- **Transmission mode (RS-422/485):**
  - RS-422: Four-wire half-duplex multi-drop connection (1:n (n = 1 to 31))
  - RS-485: Two-wire half-duplex multi-drop connection (1:n (n = 1 to 31))
- **Baud rate:** 1200, 2400, 4800, 9600, 19200, 38400, 57600, or 115200 bps
- **Data length:** 7 or 8 bits
- **Start bit:** 1 bit
- **Stop bit:** 1 bit or 2 bit
- **Parity:** ODD, EVEN, or NONE
- **Communication distance:**
  - 1200 m (57600 bps or less), 600 m (115200 bps)
- **Modbus/RTU communication:**
  - Reading or writing of measurement data on other instruments is available by Modbus protocol.
  - Communication channel function (/MC option) is needed to read measurement data from other instruments.
- **Modbus operation modes:** Master or slave

#### Bluetooth Communication Function (/C8)*
- **Data monitoring, setting, and operation is possible on a tablet, such as a Bluetooth compatible PC or smartphone, through Bluetooth communication.**
- **Compliant standard:** Bluetooth Ver 2.1+EDR
- **Supported profile:** SPP (Serial Port Profile)
- **Carrier frequency band:** 2402 to 2480 MHz
- **Channel spacing:** 1 MHz
- **Number of channels:** 79
- **Communication distance:** Approx. 10 m (depends on the operating environment) (Class2)
- **Protocol:** Dedicated protocol
  - Operate and set the GM10 and output data using a dedicated protocol.

### OS

<table>
<thead>
<tr>
<th>Item</th>
<th>Specifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows Vista</td>
<td>Home Premium SP2 (excluding 64-bit editions)</td>
</tr>
<tr>
<td></td>
<td>Business SP2 (excluding 64-bit editions)</td>
</tr>
<tr>
<td>Windows 7</td>
<td>Home Premium SP1 (32-bit edition and 64-bit editions)</td>
</tr>
<tr>
<td></td>
<td>Professional SP1 (32-bit edition and 64-bit editions)</td>
</tr>
<tr>
<td>Windows 8.1</td>
<td>None (edition without the edition name) Pro</td>
</tr>
</tbody>
</table>

### Compatible Browsers

Internet Explorer 8, Internet Explorer 9, Internet Explorer 10, Internet Explorer 11
HTTP1.1 and JavaScript are used.

### Software

Java Runtime Environment 1.7.0_xx (Version 7 Update xx), where xx is 51 or higher

### Mathematical Functions with Report Function (/MT)

#### Mathematical Function:
- **Number of math channels:** 100
- **Operations:**
  - General arithmetic operations: Four arithmetic operations (+, -, *, /), square root, absolute, common logarithm, natural logarithm, exponential, and power
  - Relational operations: <, ≤, >, ≥, =, ≠
  - Logic operations: AND, OR, NOT, and XOR
  - Statistical operations: TLOG (maximum, minimum, average, sum, P-P values of time series data), CLOG (maximum, minimum, average, sum, P-P values of a specified channel)
  - Special operations: PRE, HOLD, RESET, CARRY
  - Conditional operation: \([a?b:c]\)
  - Bit operation: BIT
  - Integer extracting operation: INT
  - Remainder extracting operation: MOD
  - Trigonometric functions: SIN, COS
  - Computation accuracy: Double-precision floating point
- **Data that can be used**
  - Channel data:
    - Measurement channels: 0001 to 6516
    - Math channels: A001 to A100
  - Communication channels:
    - C001 to C300 (GM10-1)
    - C001 to C500 (GM10-2)
    - Constants: K001 to K100
    - Internal switches: S001 to S100
    - Flags: F01 to F20
  - Recording state: REC01

#### Report function:
- **Number of report channels:** 60
- **Report types:** Hourly + daily, daily + weekly, daily + monthly, batch, day custom
- **Computation types:** Average, maximum, minimum, sum, instantaneous value
- **Unit of sum:** OFF, /s, /min, /hour, /day
- **Report templates:** Office Open XML spreadsheet files (which can be displayed with Microsoft Office Excel) or PDF files can be output or printed out with any LAN-connected printer supporting the HP PCL5c language and the port 9100.

### Communication Channel Function (/MC)

Data of external devices, such as PLC and PC, can be displayed and recorded:
- **Number of communication channels:**
  - GM10-1: 300 (C001 to C300)
  - GM10-2: 500 (C001 to C500)
Log Scale (ILG)
A logarithmic voltage that has been converted from a physical value is applied to the GM10, and then the GM10’s Log scale (logarithmic scale) is used to display and record the physical value.

- **Input type:** Log input (logarithmic input), pseudo log input (input that supports pseudo logs), log linear input (input that is linear on a logarithmic scale)
- **Range:** 20mV/60mV/200mV/1V/2V/6V/20V/50V
- **Scalable range:**
  - **Log input:** 1.00E-15 to 1.00E+15 (15 decades maximum)
  - **Scale_L < Scale_U**
    - If the lower limit mantissa is 1.00, the difference between the exponents must be 1 or more.
    - If the lower limit mantissa is a value other than 1.00, the difference between the exponents must be 2 or more.

  - **Pseudo Log Input/Log linear input** 1.00E-15 to 1.00E+15 (15 decades maximum)
    - The upper limit mantissa is the same as the lower limit mantissa.
    - If the lower limit mantissa is 1.00, the value must be between 1.00E–15 and 1.00E+15, the difference between the exponents must be 1 or more, and the maximum decades is 15.
    - If the lower limit mantissa is a value other than 1.00, the value must be between 1.01E–15 and 9.99E+14, the difference between the exponents must be 1 or more and the maximum decades is 15.

- **Alarm type:** High limit, low limit, delay high limit, delay low limit
- **Alarm setting range:** The range converted into the LOG scale corresponding to -5% to 105% of the span width.
- **Alarm hysteresis:** Fixed to 0
- **Green band setting range:** The lower limit to the upper limit of the scale. However, the lower limit of the display position must be smaller than the upper limit.
- **Decimal place:** 1 or 2
- **Misc:** Nonlinear input is possible by correcting the input value.

WT Communication (IE2)
Acquires data by connecting to WT equipment manufactured by Yokogawa Meters & Instruments Corp. via Ethernet communication.
- **Supported models:** WT1800, WT500, WT300
- **Number of connectable units:** 16
- **Communication cycle:** 500 ms/1 s/2 s/5 s/10 s/15 s/20 s/30 s
- **Types of data that can be obtained:** Voltage, current, power, power factor, phase, electrical energy, high-frequency wave, etc.
- **Number of data allocations:** 300

EtherNet/IP Communication (IE1)
Can join an Ethernet/IP network as an adapter (or a server)
- **Loading data from the measurement (I/O module) channel or math channel (MT)**
- **Loading and writing data from/to the communication channel (MC)**
- **Implementation level:** Level 2
- **Maximum number of connections:** 20 (up to 10 at the TCP/IP level)
- **Supported protocols:** EIP/PCCC, EIP/native
### GM10 HARDWARE SPECIFICATIONS
- **Material:** Polycarbonate
- **External Dimensions:** 45.1(W)×111(H)×107.1(D) mm
- **Weight:** Approx. 0.25 kg

#### Power Supply and Isolation
- **Power supply:** Supplied from the GM90PS Power Supply Module
- **Power consumption:** 2.8 W maximum
- **Insulation resistance:** Between RS-422/485 terminal and internal circuit and between Ethernet terminal and internal circuit, 20 MΩ or higher at 500 V DC
- **Isolation diagram**

<table>
<thead>
<tr>

### GM90MB MODULE BASE SPECIFICATIONS

- **Number of installable modules:** 1
- **Power consumption:** Less than 0.01 W
- **Automatic module number assignment function:** Automatically assigns a module number when a module is connected
- **External Dimensions:** 56.8(W)×135(H)×103.1(D) mm
- **Weight:** Approx. 0.15 kg

GM90PS POWER SUPPLY MODULE
SPECIFICATIONS

- Rated supply voltage: 100 to 240 VAC
- Allowable supply voltage: 90 to 264 V AC
- Power frequency: 50 Hz ± 2%, 60 Hz ± 2%
- Power switch: Available
- Terminal type: Inlet or M4 screw terminal
- Allowable interruption time: Less than 1 cycle of the power supply frequency
- Insulation resistance: Between the power supply terminal and earth: 20 MΩ or higher at 500 V DC
- Withstand voltage: Between the power supply terminal and earth: 3000 V AC (50/60 Hz) for 1 minute
- Grounding: Be sure to set a low grounding resistance.
- Material: Polycarbonate
- External Dimensions: 56.8(W)×135(H)×107.1(D) mm
- Weight: Approx. 0.55kg

Web browser:
Supported browser: Windows Internet Explorer
Java Runtime Environment 1.7.0_xx
(Version 7 Update xx) where xx is 51 or higher
Version: Internet Explorer 8, Internet Explorer 9, Internet Explorer 10, or Internet Explorer 11

Hard disk:
100MB or more of free space (depending on the amount of data, you may need more memory).

Display:
A video card that is recommended for the OS and a display that is supported by the OS, has a resolution of 1024 x 768 or higher, and that can show 65,536 colors (16-bit, high color) or more.

Universal Viewer
The universal viewer can display the following data generated by data loggers or recorders on the screen and print it out on the printer.
• Display data file
• Event data file
• Report data file
• Manual sampled data file

Viewer function: Waveform display, digital display, circular display, list display, report display, operation log display, etc.

Data conversion: File conversion to Excel and ASCII format

Hardware Configurator
• Offline setting on Web browser
Settings can be configured from Internet Explorer 8, 9, 10, and 11.

IP Address Configurator
• GM10 IP address assignment
Edit the GM10’s host name, IP address, DNS server, domain name, domain suffix, and so on as well as register the host name to a DNS server.
• GM10 search Search for GMs in the same network segment and list them.
