Top view of the triaxial accelerometer. The device is rectangular with a width of 1.35 [34.3] and a height of 1.35 [34.3]. The distance between the center of the X-axis sensor and the center of the Y-axis sensor is 1.05 [26.7]. The distance between the center of the Y-axis sensor and the center of the Z-axis sensor is 1.05 [26.7]. There are two mounting holes, each with a diameter of 0.180 (2X Ø.180 THRU). The X, Y, and Z axes are indicated by arrows. Three electrical connectors are shown at the bottom of the device.

Front view of the triaxial accelerometer. The device has a width of 1.00 [25.4] and a height of 0.77 [19.5]. The distance between the center of the X-axis sensor and the center of the Y-axis sensor is 0.77 [19.5]. The distance between the center of the Y-axis sensor and the center of the Z-axis sensor is 0.77 [19.5]. The X, Y, and Z axes are indicated by arrows. The distance from the bottom edge of the device to the center of the X-axis sensor is 0.50 [12.7].
